YEUNG Tsz Wan Karen (F.5)

NG Sin Tung (F.5)

為了解決大型展覽和休閒活動缺乏公共空間的問題，本方案計劃建造一個紅磡道天橋公園，讓公眾享受綠色環境。通過綠色公園的設計，公園將如混凝土叢林中的一片綠洲般，為公眾提供放鬆心情的地方。

綠色公園的設計尺寸為8米高，750米長，一共以八個部分組成，每部分皆有不同設施供市民使用。設施包括休閒座位、表演舞台、不同的綠化設計，更設有給一家大小遊玩的遊樂場，好讓居民放鬆心情。為了讓市民獲得舒適清爽的享用體驗，公園兩旁採用Helios的設計。Helios在於把風扇嵌入太陽能板內，當內部感溫器超過25°C便會自動運行，同時提供燈光以確保市民安全。

To solve the problem of insufficient public space for massive exhibition and relaxation, we plan to build an elevated and elongated park on Hung Hum Road which connects the flyover of Dyer Ave and Bailey Street. We will have enough space for the park by simply removing the fence of the flyover and the road divider of Hung Hum Road in our designated route.

By our green design of the park, it can act as an oasis in the concrete jungle and as a new option for relaxing. There will be benches, lawns and playgrounds in the park as to provide more facilities for the public to enjoy. With 'Helios', a breakthrough fence will be designed with fans embedded inside the solar panels, as to create a better environment can be created automatically when the temperature gets high. Our park provides space for users to communicate and expand their social circles, thus creates a cheerful and hyped atmosphere in Kowloon City, with stronger social cohesion.

Helios combines the characteristics of pedestrian roads and parks to provide users a variety of experiences, which makes it outcompete normal roads and parks. Besides, Helios features seasonal themes which keeps the park fresh and unique.

A myriad of benefits in different aspects will be brought by the park. At community level, the park creates a green landscape and acts as a landmark in the district. It also provides a safer alternative route and acts as a public space for relaxation. At economy level, it will bring positive economic impacts to nearby shops near Helios and boost the local economy. At cultural level, the park is also a nice place for different local artists. In conclusion, Helios will be beneficial to Kowloon City in different aspects.
